

Accessories

Broad Spectrum Threadlocker™

Threadlocker® is a versatile, single-component thread adhesive that surpasses traditional metal fasteners by effectively countering shock and vibrations, preventing the loosening of nuts, bolts, plugs, fittings, and various parts. It also combats rust and corrosion, making it adaptable to a wide range of fastener types and sizes. Easily disassembled with standard hand tools and non-toxic, it offers both adaptability and practicality across various industries.

Trace® Internal Leak Detector

Trace® is a highly effective leak detector for mineral oil systems. Contains a vibrant red dye that transforms into a bright purple-blue color under UV light, making leak detection easy without disrupting system operations. It will leave no residue or deposits in the system. Additionally, it is excellent for detecting intermittent leaks, as the red color and fluorescent tracer remain on the equipment until wiped off.

Trace 2® Internal Leak Detector

Trace 2® is a highly effective leak detector for AC, refrigeration, and hydraulic systems. Contains a vibrant red dye that transforms into a bright purple-blue color under UV light, making leak detection easy without disrupting system operations. It will leave no residue or deposits in the systems. Additionally, it is excellent for detecting intermittent leaks, as the red color and fluorescent tracer remain on the equipment until wiped off.

Solderlene® Soldering Flux

Solderlene® Soldering Flux is an advanced sweat paste flux with wetting agents that facilitate solder flow for low and mid-temperature soft solders. It is lead-free and effective on all metals except aluminum and magnesium. Designed for year-round use, it maintains a consistent texture regardless of temperature variations, outperforming competitors. Ideal for sweat soldering common metals (excluding aluminum and magnesium), Solderlene® features a self-cleaning, lead-free formula with superior coverage and flow. As a wetting agent, it reduces surface tension and chemically removes oxides on contact, preventing oxidation during heating.

Thawzone® Liquid Dehydrant

Thawzone®, the original liquid dehydrant, quickly removes and eliminates moisture from all refrigerants in 5 minutes or less. Unlike conventional driers, Thawzone® remains effective regardless of refrigerant temperatures, ensuring consistent performance and preventing refreezing. It leaves no residue, contains no dissolved solids or methanol, and is compatible with all refrigerants and lubricants. Additionally, Thawzone® prevents acid formation and aids in oil returns in low-temperature systems. Not only is Thawzone® fast and efficient, but it is also a safe, non-toxic, biodegradable, and environmentally friendly solution.
