Orange Pan Potion™ Instructions

Turn off all power to the system.

Remove panel of the air handler revealing drain pan, remove drain pan.

Clear drain pan of any debris, oils, etc. revealing a clean, dry surface.

Cover any penetrating holes or cracks with duct tape on external side of the pan for temporary support & plug up the drain pipe opening, prior to application.

Pour Part A (Red Resin) bottle into Part B (Yellow Hardener) bottle, screw cap back onto bottle and begin shaking. Shake product thoroughly until contents have reached a consistent “orange” color.

Once fully mixed, pour out ENTIRE contents into pan, some residual will remain.

DO NOT LEAVE EXCESSIVE AMOUNT OF PRODUCT IN BOTTLE

****Tip:** Product is self-leveling. For a quicker, full coverage application, sit pan vertically or move pan around until desired results are achieved.

Allow product to cure for approximately 1 hour, results may vary depending on temperature and humidity.

****Note:** Make sure to follow instructions, failure to fully mix product, can result in an improper application.
